

Sorting Center/Logistics:

Receive Parcel

↓

Scan Parcel

↓

Read Delivery Address

↓

Determine Delivery Area

↓

Sort Parcel According to Destination Area

↓

Identify Rider Assigned to That Area

↓

Assign Parcel to Rider

↓

Rider Receives Delivery Assignment

For example:

PARCEL	DELIVERY ADDRESS	AREA	ASSIGNED RIDER
#1001	Santa Cruz, Laguna	Area A	Rider 01
#1002	Pagsanjan, Laguna	Area B	Rider 02
#1003	Los Baños, Laguna	Area C	Rider 03

2 main responsibility of the sorting center/logistics:

1. Sort the parcel according to destination
2. Assign the parcel to the appropriate rider based on the rider's assigned area

Note: Partial pa lang ito para sa tasks ng sorting center/logistics. Ang kulang na lang naman dito ay yung process ng registration nya kay admin, pagapprove/disapprove ng registration ng rider/courier, chat/messaging, generate report (transactions and commission), account management, etc.
